Design läge

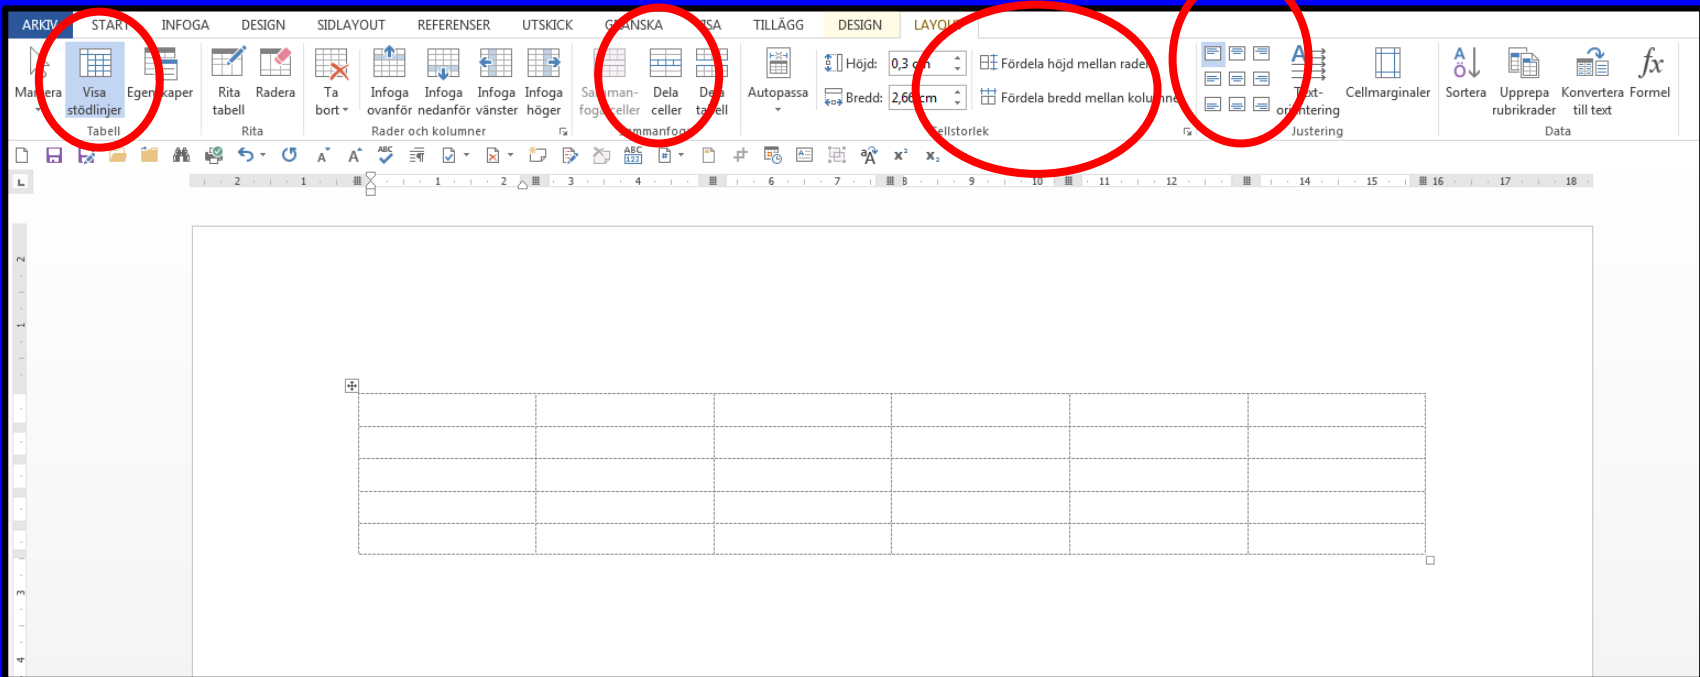

The screenshot shows the Microsoft Word interface with the Table Tools ribbon active in Design mode. The ribbon includes tabs for DESIGN and LAYOUT. The DESIGN tab is selected, showing various table grid styles and options for border color and width. A table with 6 columns and 4 rows is visible in the document area. A red circle highlights the top-left corner of the table, where a small crosshair icon is located. Another red circle highlights the border options in the ribbon, specifically the 'Kantlinjer' (Borders) section, which includes a dropdown menu for border styles and a 'Kantlinjer pennan' (Border Pen) button. Red arrows point from the text boxes to these elements.
