

# Information om vaccinering mot corona-virus

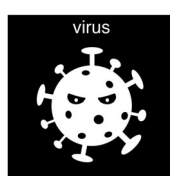

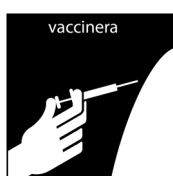

Alla som är över 18 år kan få vaccin mot corona-viruset.

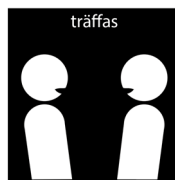

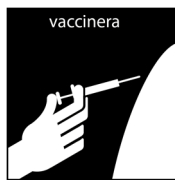

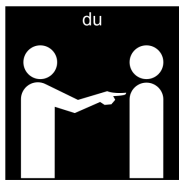

Vaccinet är bra att ta.

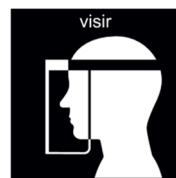

Vaccinet gör att du inte blir jättesjuk eller dör av viruset.

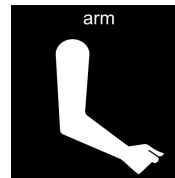

Att vaccinera sig mot corona-viruset kostar inte pengar.

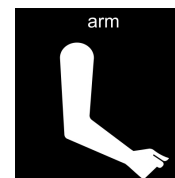

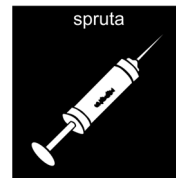

När du ska vaccinera dig får du träffa en sjuksköterska.

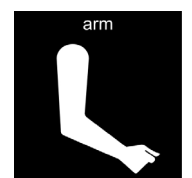

Sjuksköterskan kan ha munskydd, visir och handskar.

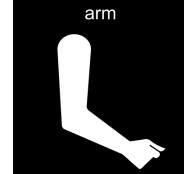

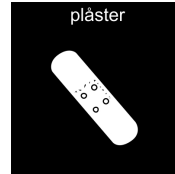

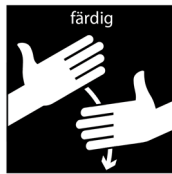

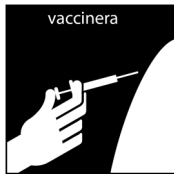

Sjuksköterskan torkar först med sprit på din arm.

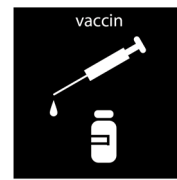

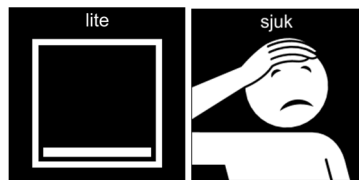

Sjuksköterskan vaccinerar dig med en spruta i armen.

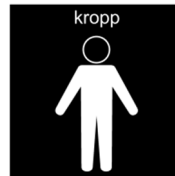

När sjuksköterskan vaccinerar dig kan det göra lite ont i armen.

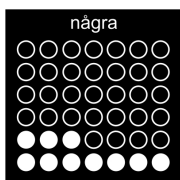

När vaccineringen är färdig får du ett plåster på armen.

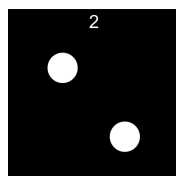

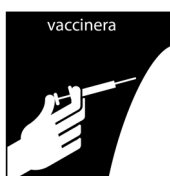

Du kan känna dig lite sjuk när du har fått vaccinet.

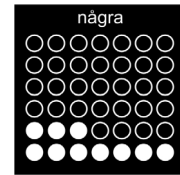

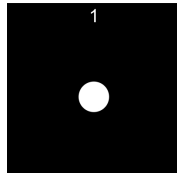

Du kan bli frusen, få feber eller ont i kroppen.

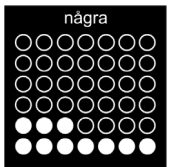

Efter några dagar känner du dig frisk igen.

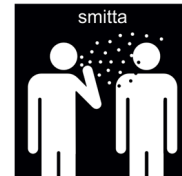

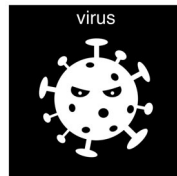

Du ska vaccinera dig två gånger.

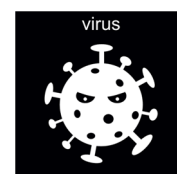

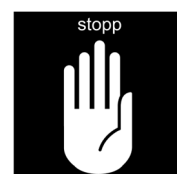

När du vaccinerat dig en gång måste du vänta några veckor.

Efter några veckor ska du vaccinera dig igen.

Vaccinet gör det svårare för corona-viruset att smitta dig.

Vaccinet är viktigt för att kunna stoppa corona-viruset.
